

The European Security and Information Congress (Les Assises) 2011: Keynectis Announces MFT (Managed File Transfer) Online

Join Keynectis for an Exclusive Demo for iPad
at the European Security and Information Congress (Les Assises)
Grimaldi Forum Monaco – Keynectis / OpenTrust Booth (n° 30 & 31)
Espace Diaghilev Upper Level

Keynectis, European leader in trust technologies and services, announces the availability of MFT Online in SaaS mode.

The exchange of electronic documents and files, whether with internal or external contacts, has today become mandatory for productivity and simplicity in numerous enterprises.

The **MFT (Managed File Transfer) Online** solution by Keynectis simplifies electronic exchanges and ensures that they can be tracked.

Used in Web mode via a standard Internet Browser, MFT Online enables different categories of users (internal, roaming, external) to send and receive files of all types and sizes.

This economical solution significantly reduces the global costs of document exchange:

- with or without the explicit authentication of senders/receivers
- with or without the encryption of content

“MFT Online is a reliable and efficient means of communication which improves the productivity of users and business processes. Its scalable architecture can support user populations of all sizes, from several hundred users to several hundreds of thousands. MFT Online is easily integrated into any information system and ownership costs are very attractive” said Pascal Colin CEO Keynectis and OpenTrust.

Please send an email to info@keynectis.com for a free no-obligation trial of MFT Online in SaaS mode.

About Keynectis: Keynectis is a software and SaaS provider, fully focused on securing digital identities, communications and transactions. Pioneer of Cloud Computing, with more than 12 years of experience, Keynectis provides governments, financial institutions and enterprises around the world with a wide range of products and services for managing digital identities and securing electronic communications and documents. With over 25 million digital identities protected each year, Keynectis is the European leader in digital security.

M. Thierry Dassault is Chairman of the Board of Directors.

July 2011, Keynectis acquired OpenTrust, leader in trusted infrastructure solutions for enterprise and government.
